CHOICE TULIPS

Darwins for those who like the brighter colors. Breeders for those whose taste runs to the more subtle subdued color tones. Both are excellent for bedding, borders, pots or cut flowers. The Single earlies make a delightfully colorful early bed. And last but not least, the Beautiful Fantasy, Parrot tulip is best in the rockery or accent point in any garden; also a favorite for cutting.

BEDDING: Select a well-drained location with good soil, prepare bed thoroughly, adding well-rotted compost, if possible. Set bulbs 6 inches deep 6 inches apart. After the ground freezes over, give a very light covering of litter, straw or compost if climate is severe; this should be removed in early spring.

FANTASY

FANTASY (Parrot Tulip). Popular and especially fine for decorative pots. This most beautiful of Parrot tulips is given a unique and distinctive character by its showy, lacinated and fringed petals. The coloring is a glorious soft pink with shadings of deep velvety rose, oft-times with delicate green markings on back of petals. Handsome for early potting and gorgeous in beds. English grown bulbs. 3 for 35c; 12 for \$1.15; 100 for \$8.25.

AMARYLLIS FORMOSISSIMA

Bulbs 25c each; 3 for 65c; 12 for \$2.50.

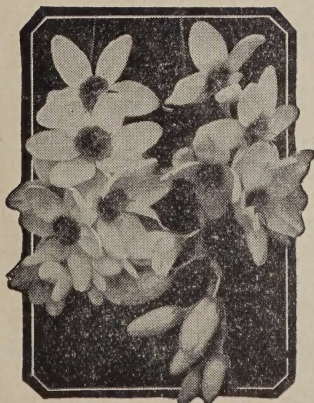

CAMASSIA LEICHTLINA

Indian Lily. A most attractive and completely hardy member of the Lily family; the Indian Lily is hard to beat for naturalizing, and makes an excellent border plant. In late May and June the 2-3 ft. flower spike bears a profusion of star-shaped flowers 1½ in. across, ranging in color from lavender to aconite blue. Plant bulbs 4-5 in. deep in late fall, and they will need little attention for years.

CALLA-RICHARDIA

May be brought into bloom at almost any time desired. Prepare the soil by using equal parts of sand, leaf mold and well rotted compost and pot with good drainage. Set tubers one inch beneath surface, as the roots develop near the top, apply tepid water freely while plant is growing. If bloom stalks are cut out carefully when faded, one may have three to the plant. After flowering season, ripen off the tubers and give a rest period of at least two months before bringing into bloom again.

White (Aethiopica). Very popular. The large smooth glossy arrow-shaped leaves with the beautifully pointed creamy white flower (spathe) surrounding a yellow spadix make a handsome pot plant. After flowering and resting, the plant may be set near pool or any moist semi-shady spot for summer blooming. **Each 25c; 6 for \$1.35.**

Yellow (Elliottiana). These bulbous plants will be ready for shipment by December. The rounded white spotted leaves and rich golden flowers form a handsome pot plant. **Each 30c; 3 for 85c; 6 for \$1.60.**

CALLA

Black (Arum Pictum). This curiosity of the flower world comes from Corsica, a French island in the Mediterranean. Its long pointed leaves appear in the spring, followed by a dark lavender red flower, centered by its purple black spadix. **50c each.**

Pink or Rose (Rehmanni). A rare species from South Africa much sought after because of its delicate color. Limited quantity. **70c each.**

BLACK CALLA

DICENTRA (Dielytra)

ERYTHRONIUMS (Dog Tooth Violets)

The richly mottled foliage of the plants alone makes them worthy of a place in a shady corner of your garden or rockery. Give woodland condition of leaf mold covering in well-drained, moist, rich location. We have been fortunate in securing the four outstanding colors as well as a fine mixture.

BRODIAEA

Brodiaea Laxa (Triplet Lily). Known also as **Triteleia Laxa**, this native California flower is good for rock garden or in the South for naturalizing. Although the grass-like foliage is commonplace, the great clusters of lavender blue flowers are really striking on their 15-inch to 20-inch stems. A good keeper either on the plant or when cut. It requires a light sandy soil with very good drainage and a sunny location. Plant 2½ inches deep before the ground freezes, and mulch with well-rotted manure. Hardy in the South.

NARCISSUS (Daffodils)

Park's Choice Collection

This versatile, enchanting family of flowers, so easily adaptable to the garden or indoor culture, is early flowering, hardy, fragrant, useful, and beautiful. Botanically classed as *Narcissus*, many are commonly called Daffodils. The Polyanthus or Paperwhites may be grown in bowls of water with stones to give the bulbs stability. For indoor winter flowering, 5 to 6 bulbs of any variety planted in a pot of well-drained good garden soil and kept in a cool dry place until roots form, will bloom earlier than when planted in the garden bed or border. Several plantings will give blooms over a longer period. For naturalizing or in the garden, place in sunny situation, in good garden soil $1\frac{1}{2}$ times the length of bulb. Plant in fall any time until the ground freezes solid.
